## School Track™ Student Activity Tracking

School Track™ is a software solution designed to allow schools to accurately and securely track student and staff activities within the campus. Students and Staff can be enrolled in a comprehensive database providing immediate access to critical information. Once a student is enrolled their activity history can be tracked. School Track™ is designed not only to track attendance and tardiness of students but also to track the student's use of school facilities such as the cafeteria, library, weight room, or after school activities. School Track™ is designed to work on a standalone PC in the main office or on multiple workstations connected to a central database on the campus network. Our solution is flexible and will meet the demanding requirements for school administrators.

### ***Feature Rich Software***

- ◆ ***Student /Staff Database***
  - Comprehensive data entry screen.
  - A fully configured Microsoft Access Database.
  - Optional SQL Server 2000 support.
  - The ability to integrate with ID Works™ for photo capture and issuance of personalized plastic ID cards with bar codes and magnetic stripes (optional feature).
  
- ◆ ***Student/Staff Attendance and Activity Tracking***
  - Customize tracking fields to capture event specific information like activity name and location.
  - Verify Student status during check in.
  - Track arrival and departure times and dates.
  - Print Student Attendance/Activity Reports.
  - Students can be automatically tracked with a card swipe upon arrival.
  
- ◆ ***Track Student Absent and Tardy Incidents***
  - History of absence and tardy activities.
  - Print absent permission slips or tardy passes.
  - Print tracking history reports.
  
- ◆ ***Guardian Information***
  - Each student record will have a guardian profile screen.
  - Profile can contain photo, name, relationship and date of birth.

◆ **Retail and Reward Tracking**

- Track prepaid balance on student account for use in bookstore or cafeteria.
- Track reward points for student activities or purchases.

**Easy Implementation and Customization**

School Track™ is designed to be easy to install and support. The pre-configured database and screens mean minimal time and effort are required to get started. The software includes the ability to easily add drop down lists for many of the data entry fields.

**School Track™ User Interface**

School Track™ provides an easy to use interface for verification of an individual's identity and the ability to track visits or activities with your organization.

**Sample School Track™ verification and tracking screen**

Note: IDWorks™ is a trademark of Datacard Group
